Subject Index of Volume 240

Adhesion
wear, friction and sliding speed correlations on Langmuir–Blodgett films observed by atomic force microscopy, 105
Adsorption
considerations on the adsorbed water concentration of sulfuric porous aluminium oxide, 73
optical transitions in laser-evaporated thin $CuInSe_2$ films, 114
relationship between staphylococcal protein A distribution and surface pressure of protein-containing phospholipid films, 138
Aluminium
defects in amorphous and solid phase epitaxial silicon, 39
Aluminium nitride
chemical stability of laminated AlN/AlN:H films, 45
Aluminium oxide
considerations on the adsorbed water concentration of sulfuric porous aluminium oxide, 73
on the aluminium hard anodization and the critical value V^* of the barrier layer voltage, 88
Amorphous materials
dependence of the a-Si:H defect density of states on the magnetic field profile of an electron cyclotron resonance microwave plasma, 152
growth and ellipsometric studies of periodic and Cantor aperiodic amorphous Ge/Si superlattices, 7
memory switching in amorphous Ge–Se–Tl chalcogenide semiconductor films, 143
Anisotropy
polyimide film containing ultra-fine particles, 157
Anodic oxidation
on the aluminium hard anodization and the critical value V^* of the barrier layer voltage, 88
Atomic force microscopy
tribology of ultra-thin MoS_2 platelets on mica: studies by scanning force microscopy, 101
wear, friction and sliding speed correlations on Langmuir–Blodgett films observed by atomic force microscopy, 105

Biomaterials
relationship between staphylococcal protein A distribution and surface pressure of protein-containing phospholipid films, 138
Bismuth
the composition and conductivity of electrodeposited Bi–Te alloy films, 70

Carbices
On the synthesis of Fe–C compounds under the influence of laser radiation, 60
Carbon
Plasma deposition of hydrogenated amorphous carbon: growth rates, properties and structures, 28
polyimide film containing ultra-fine particles, 157
Coatings
use of Raman scattering to study disorder in pulsed laser deposited MoS_2 films, 76
Cobalt
non-destructive thickness determination of thin cobalt and cobalt disilicide layers on silicon substrates, 110
Copper
optical transitions in laser-evaporated thin $CuInSe_2$ films, 114
Corrosion
chemical stability of laminated AlN/AlN:H films, 45
Crystallization
random stacking in MoS_{2-x} sputtered thin films, 56

Deposition process
composition and conductivity of electrodeposited Bi–Te alloy films, 70
dependence of the a-Si:H defect density of states on the magnetic field profile of an electron cyclotron resonance microwave plasma, 152
studies on the preparation and characterization of chemically deposited Ag_2S films from an acidic bath, 1
study of microstructure of epitaxial fullerenes films, 14

Electrical properties and measurements
photoresponse of high resistance anatase TiO_2 films prepared by the decomposition of titanium isopropoxide, 163
Electronic devices
memory switching in amorphous Ge–Se–Tl chalcogenide semiconductor films, 143
Ellipsometry
growth and ellipsometric studies of periodic and Cantor aperiodic amorphous Ge/Si superlattices, 7
kinetic study of diacetylene polymerization in mono- and multilayers of the Langmuir–Blodgett type, 131
Epitaxy
study of microstructure of epitaxial fullerenes films, 14

Fluorescence
relationship between staphylococcal protein A distribution and surface pressure of protein-containing phospholipid films, 138
Fourier transform infrared spectroscopy
polyimide film containing ultra-fine particles, 157

Glass
memory switching in amorphous Ge–Se–Tl chalcogenide semiconductor films, 143
Growth mechanism
plasma deposition of hydrogenated amorphous carbon: growth rates, properties and structures, 28

Hardness
mechanical properties of nanocomposite thin films, 82
Hydrogen
chemical stability of laminated AlN/AlN:H films, 45

Infrared spectroscopy
chemical stability of laminated AlN/AlN:H films, 45
Interfaces
low-dimension structural properties and microindentation studies of ion-beam-sputtered multilayers of Ag/Al films, 52
polyimide film containing ultra-fine particles, 157
Ion implantation
surface physical and chemical changes of pure iron after molybdenum ion implantation and their effects on the tribological behaviour I: Physical and chemical analysis, 92

Iron
surface physical and chemical changes of pure iron after molybdenum ion implantation and their effects on the tribological behaviour I: Physical and chemical analysis, 92

Langmuir–Blodgett films
kinetic study of diacetylene polymerization in mono- and multilayers of the Langmuir–Blodgett type, 131
wear, friction and sliding speed correlations on Langmuir–Blodgett films observed by atomic force microscopy, 105
Laser ablation
optical transitions in laser-evaporated thin $CuInSe_2$ films, 114
use of Raman scattering to study disorder in pulsed laser deposited MoS_2 films, 76

Metal–oxide semiconductor structures
influence of wettability on the properties of thin porous platinum films as gates of metal–oxide–semiconductor devices in electroyltes, 147
Mica
tribology of ultra-thin MoS_2 platelets on mica: studies by scanning force microscopy, 101
Molybdenite
random stacking in MoS_{2-x} sputtered thin films, 56
Molybdenum
surface physical and chemical changes of pure iron after molybdenum ion implantation and their effects on tribological behaviour I: Physical and chemical analysis, 92
Molybdenum sulphide
improved tribological properties of sputtered MoS_2 films through N^+ implantation, 97
Monolayers
kinetic study of diacetylene polymerization in mono- and multilayers of the Langmuir–Blodgett type, 131
Mossbauer spectroscopy
on the synthesis of Fe–C compounds under the influence of laser radiation, 60
Multilayers
kinetic study of diacetylene polymerization in mono- and multilayers of the Langmuir–Blodgett type, 131
low-dimension structural properties and microindentation studies of ion-beam-sputtered multilayers of Ag/Al films, 52
mechanical properties of nanocomposite thin films, 82

Nanostructures
low-dimension structural properties and microindentation studies of ion-beam-sputtered multilayers of Ag/Al films, 52
mechanical properties of nanocomposite thin films, 82
X-ray photoelectron spectroscopic studies on pyrolysis of thin films of plasma-polymerized acrylonitrile, 66
Nitrogen
improved tribological properties of sputtered MoS_2 films through N^+ implantation, 97

Optical coatings
structural investigation of bulk and thin film PLZT using X-ray absorption spectroscopy, 22
Optical properties
growth and ellipsometric studies of periodic and Cantor aperiodic amorphous Ge/Si superlattices, 7
optical transitions in laser-evaporated thin $CuInSe_2$ films, 114
studies on the preparation and characterization of chemically deposited Ag_2S films from an acidic bath, 1
study of the Lorentz–Lorenz law and the energy loss of ^4He ions in titanium oxide films, 121
Organometallic vapour deposition
characterization of Al-doped n-type ZnSe prepared under a zinc-rich growth condition by low-pressure organometallic chemical vapor deposition, 116

Phase transitions
on the synthesis of Fe–C compounds under the influence of laser radiation, 60
Photodesorption
photoresponse of high resistance anatase TiO_2 films prepared by the decomposition of titanium isopropoxide, 163
Plasma processing and deposition
dependence of the a-Si:H defect density of states on the magnetic field profile of an electron cyclotron resonance microwave plasma, 152
plasma deposition of hydrogenated amorphous carbon: growth rates, properties and structures, 28
X-ray photoelectron spectroscopic studies on pyrolysis of thin films of plasma-polymerized acrylonitrile, 66
Platinum
influence of wettability on the properties of thin porous platinum films as gates of metal–oxide–semiconductor devices in electrolytes, 147
Pyrolysis
X-ray photoelectron spectroscopic studies on pryolysis of thin films of plasma-polymerized acrylonitrile, 66

Raman scattering
use of Raman scattering to study disorder in pulsed laser deposited MoS_2 films, 76
Rutherford backscattering spectroscopy
non-destructive thickness determination of thin cobalt and cobalt disilicide layers on silicon substrates, 110
study of the Lorentz–Lorenz law and the energy loss of ^4He ions in titanium oxide films, 121

Semiconductors
memory switching in amorphous Ge–Se–Tl chalcogenide semiconductor films, 143
Silicon
defects in amorphous and solid phase epitaxial silicon, 39
dependence of the a-Si:H defect density of states on the magnetic field profile of an electron cyclotron resonance microwave plasma, 152
Solid phase epitaxy
defects in amorphous and solid phase epitaxial silicon, 39
Spectroscopic ellipsometry
non-destructive thickness determination of thin cobalt and cobalt disilicide layers on silicon substrates, 110
Sputtering
random stacking in MoS_{2-x} sputtered thin films, 56
Structural properties
improved tribological properties of sputtered MoS_2 films through N^+ implantation, 92
on the aluminium hard anodization and the critical value V^* of the barrier layer voltage, 88
on the synthesis of Fe–C compounds under the influence of laser radiation, 60
plasma deposition of hydrogenated amorphous carbon: growth rates, properties and structures, 28
random stacking in MoS_{2-x} sputtered thin films, 56

Sulphides
studies on the preparation and characterization of chemically deposited Ag_2S films from an acidic bath, 1
tribology of ultra-thin MoS_2 platelets on mica: studies by scanning force microscopy, 101
Superlattices
growth and ellipsometric studies of periodic and Cantor aperiodic amorphous Ge/Si superlattices, 7
mechanical properties of nanocomposite thin films, 82
Surface and interface states
consideration on the adsorbed water concentration of sulfuric porous aluminium oxide, 73
Surface roughness
influence of wettability on the properties of thin porous platinum films as gates of metal–oxide–semiconductor devices in electrolytes, 147
Surface stress
wear, friction and sliding speed correlations on Langmuir–Blodgett films observed by atomic force microscopy, 105
Surface structure
structural investigation of bulk and thin film PLZT using X-ray absorption spectroscopy, 22

Titanium oxide
photoresponse of high resistance anatase TiO_2 films prepared by the decomposition of titanium isopropoxide, 163
structural investigation of bulk and thin film PLZT using X-ray absorption spectroscopy, 22
study of the Lorentz–Lorenz law and the energy loss of ^4He ions in titanium oxide films, 121
Transmission electron microscopy
defects in amorphous and solid phase epitaxial silicon, 39
non-destructive thickness determination of thin cobalt and cobalt disilicide layers on silicon substrates, 110
study of microstructure of epitaxial fullerenes films, 14
Tribology
tribology of ultra-thin MoS_2 platelets on mica: studies by scanning force microscopy, 101
use of Raman scattering to study disorder in pulsed laser deposited MoS_2 films, 76

Water
considerations on the adsorbed water concentration of sulfuric porous aluminium oxide, 73
Wetting
influence of wettability on the properties of thin porous platinum films as gates of metal–oxide–semiconductor devices in electrolytes, 147

X-ray absorption
structural investigation of bulk and thin film PLZT using X-ray absorption spectroscopy, 22
X-ray diffraction
low-dimension structural properties and microindentation studies of ion-beam-sputtered multilayers of Ag/Al films, 52
random stacking in MoS_{2-x} sputtered thin films, 56
studies on the preparation and characterization of chemically deposited Ag_2S films from an acidic bath, 1
X-ray photoelectron spectroscopy
study of the Lorentz–Lorenz law and the energy loss of ^4He ions in titanium oxide films, 121
X-ray photoelectron spectroscopic studies on pyrolysis of thin films of plasma-polymerized acrylonitrile, 66
X-ray scattering
on the aluminium hard anodization and the critical value V^* of the barrier layer voltage, 88
